

LEARNERS WHO ALREADY HAVE A BACHELOR'S DEGREE AND WISH TO APPLY FOR A SECOND BACHELOR'S DEGREE IN MEDICAL LABORATORY SCIENCE

APPLYING FOR ADMISSION TO STEVENSON UNIVERSITY IS A SEPARATE PROCESS FROM APPLYING TO THE MLS PROGRAM.

1. TRANSFER STUDENTS MUST FIRST BE ACCEPTED TO STEVENSON UNIVERSITY BEFORE CONSIDERATION BY THE MEDICAL LABORATORY SCIENCE ADMISSIONS COMMITTEE .
2. TO APPLY TO THE MLS PROGRAM:
 - a. Student must have completed or be currently enrolled in the prerequisite courses listed below at the time of application to the MLS program.
 - b. If student has completed or is currently enrolled in the prerequisite coursework below, applications to the University and to the MLS Program may be submitted concurrently. Please note: The University needs enough time to act on your application for admission to the University prior to consideration by the MLS Admissions Committee.
 - c. A complete Application for Admission, including a complete transcript, must be submitted to the University prior to consideration by the MLS Admissions Committee.

College Algebra	3
Statistics	3
General Chemistry I & II	8
Organic Chemistry I OR Biochemistry	3

INSTRUCTIONS TO APPLY FOR ADMISSION:
2ND BS IN MEDICAL LABORATORY SCIENCE

The Medical Lab

work to be fair in terms of assigning student rotations. Preference for clinical rotations will be given to full-time MLS students over part-time and categorical certificate students. A wait list will be established for the full-time students based on GRAMLS courses and successful progression in the program. Students will be moved from the wait list as clinical rotation spaces become available.

All efforts will be made to have students complete their required rotations by their expected graduation date; however, students with a flagged criminal background check or positive drug screen may be unable to procure a rotation site and complete the degree requirements. Students should contact the program as soon as possible if there is any concern of this occurring, as the program will never see the results of the background check or drug screen. Due to challenges with procuring clinical rotation sites, adjustments may be made to the student's academic calendar to ensure clinical rotation time.

As a requirement in the curriculum, students are assigned to clinical affiliates within Baltimore City and surrounding counties. The University does not assume any responsibility to transport students to clinical affiliates for any reason. It is the student's responsibility to arrange to have transportation needs met which may include paying for parking. In addition, students should be aware of the possibility of day, evening or split shift rotations.

For more information concerning CLINICAL PRACTICUM, refer to the School of Nursing and Health Professions Student Guide on the MLS Portal page.

NON-ACADEMIC ESSENTIAL FUNCTIONS

INTRODUCTION

The Medical Laboratory Science program has identified certain skills and abilities necessary for acquiring the knowledge and laboratory competencies required by the curriculum. In order to participate in the program, students must be able to comply with program designated Essential Functions or request reasonable accommodations to execute these functions. The Essential Functions are academic requirements of the program comprising the physical and professional demands of the medical laboratory scientist. To ensure that the decision to pursue a career in the medical laboratory science is the correct one for the individual, each applicant is asked to determine if they are able to comply with all of these Essential Functions (see below) by which they will be assessed as a medical laboratory science major.

Stevenson is committed to providing reasonable accommodations to meet the needs of students with documented disabilities to the extent possible without fundamentally altering essential components of the program. Applicants should be aware that in addition to classroom learning, laboratory learning takes place throughout the program and involves considerations, such as safety and placement in facilities outside of the University, where it may not be possible to provide the same accommodations that can be provided in the classroom. Applicants and current students who self-identify as having a disability are advised to assess whether an accommodation may be needed in the laboratory setting as early in the program as possible, and to inquire of the program if further information on laboratory requirements is needed. The Director of Disability Services in the Office of Student Success keeps a file for each student who self-identifies as needing accommodations. The documentation from a physician, counselor, or mental health provider that verifies the disability and confidential Notification of (t)-2. prn if hre

- 4) Any other information you believe is important for the Admissions Committee to know about you
4. COURSES IN PROGRESS FORM (IF APPLICABLE)
This form should include the semester and the location where all remaining prerequisite requirements will be completed. Official transcripts for courses completed after your application is mailed must be received within one month concluding

- b. Measles, Mumps, Rubella (MMR)
 - 1. Documentation of 2 doses of measles and mumps vaccine or at least 1 dose of rubella vaccine OR
 - 2.
